

Ontario leads Canada in corporate renewable energy demand, driven by the concentration of head offices, banks, and manufacturing.

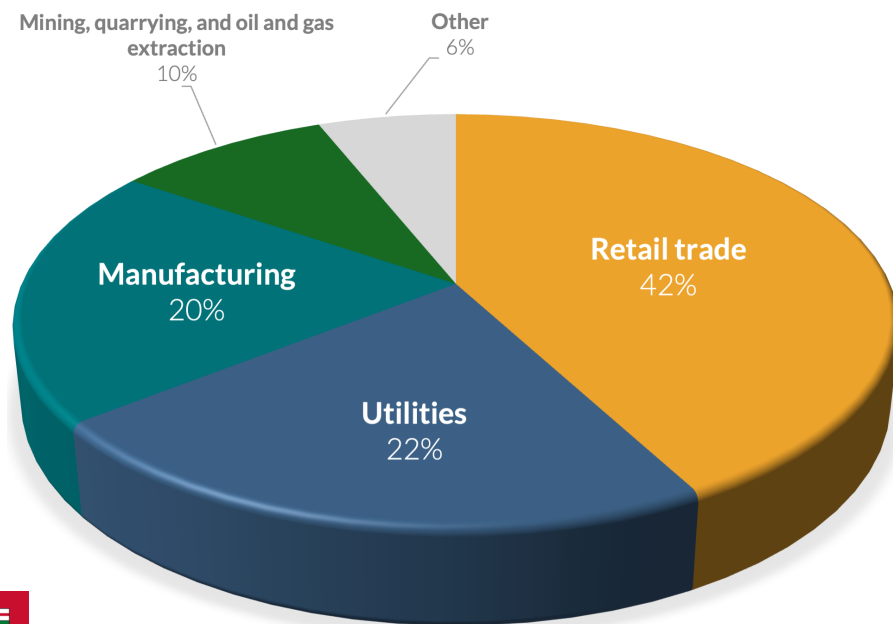

By 2030, nearly 2.5 GW must be secured to meet targets.

Renewable energy demand across years

ONTARIO: 54% national demand

Renewable energy demand by industry

While Ontario recently enabled limited vPPAs, further regulatory support could unlock massive potential. **Without it, companies may look out-of-province** to meet urgent needs - missing a major economic opportunity at home.
