

Despite a largely hydro-powered grid, companies in Quebec still require over 800 MW of renewable energy to meet Scope 2 goals.

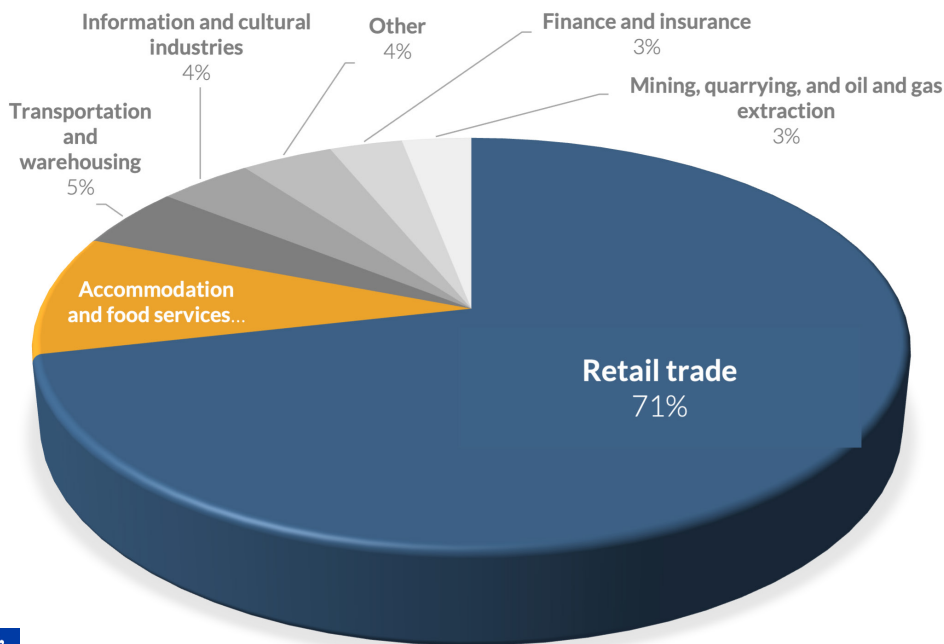

Much of this is driven by retail, food, and distribution companies.

Renewable energy demand across years

QUEBEC: 11 % national demand

Renewable energy demand by industry

With demand split evenly between 2030 and 2040, **Quebec has time, but also a clear opportunity**, to enable corporate renewable procurement within the province before buyers look elsewhere.
