Omnibus Questions

Research conducted between September 13 and 26, 2023

SUBSET: Questions pertaining to Renewable Energy
Prepared by

OPINION RESEARCH
In partnership with
Trend?search

## Methodology

- Survey questions were administered through the TrendWatch Alberta Omnibus Survey under the direction of Janet Brown Opinion Research between September 13 and 26, 2023.
- TrendWatch Alberta is a monthly omnibus survey of 900 Albertans, ages 18 and over. The margin of error for a probability sample of 900 people is plus or minus 3.3 percentage points, 19 times out of 20 (i.e., at a $95 \%$ confidence interval).
- Quotas were set to ensure a good representation of Albertans in terms of region, age, and gender. A minimal amount of weighting was conducted to ensure the data matched known population proportions from Statistics Canada.

## Survey Design

- Survey respondents were initially contacted at random by live telephone interviewers and given the option of:
- answering the survey over telephone at that time,
- answering over the telephone at a more convenient time, or
- receiving the link and answering the survey on-line.
- The initial sample list contained approximately 60 percent cellphones and 40 percent cellphones.
- Interviewers made up to five attempts to reach each phone number in the sample before classifying it as unreachable.

- All surveys were conducted by qualified interviewers working out of Trend Research's centralized CATI facility in Edmonton. Field supervisors were always present to ensure accurate interviewing and recording of responses.
- The interviewing staff at Trend receives extensive training on the proper administration of interviews and are closely monitored by supervisors. A minimum of 10 percent of each interviewer's work was unobtrusively monitored for quality control in accordance with the standards set out by the Canadian Research Insights Council (CRIC).
